

Tower Monitor series Network Monitoring Tool TM2000s

Network Monitoring Tool TM2000s

It's possible to monitor network devices by TM2000s.

Network Monitoring Devices : Max. 1,000

Monitoring items : Max. 10,000

Large-scale IoT equipment can be monitored.

Network Monitoring Tool TM2000s

- TM2000s is possible to analyze 10,000 Items/1,000 Network Devices in real time.
- TM2000s collects MIBs(traffic, packet discard, packet error, etc.)/delay time and save the logs as CSV files.
- Tower Monitor Viewer is possible to browse Network Devices Status.
- Compact , robust and portable; ideal for network construction, maintenance and operation

MIB : Management Information Base
